

Maximize lead management data.

Customer relationships and lead management applications are an important investment. Ensuring that all incoming opportunities are entered accurately into your lead management or CRM database is an essential part of your business's success. Call Sync™ maximizes the investment you have made in your customer relationship or lead management system by exporting detailed information on every call.

Designed to communicate seamlessly with any application, Call Sync™ sends call data to multiple application providers, email addresses and/or URLs that are capable of receiving that information. The call data is synchronized with your business's lead management system within seconds. The data includes all campaign information and any available caller details, such as phone number, name and address. The exported information also includes the call recording collected from Voice View, which allows you to listen to each phone call and take immediate action.

Who's Calling provides you with the tools you need to maximize your business's marketing potential and increase sales and revenue.
